

ChalkPort QMS Online Data plans

QMS Online subscription comes with a basic data plan related to use of the software and supporting services. The QMS Online **Basic Plan** meets the needs of most training organizations and comes with unlimited users and unlimited downloads.

To ensure fair use of the service limits are placed on the following:

1. Amount of data traffic generated each month from uploaded material
2. Amount of data that is stored on the hard drive of the web server

The difference between an upload and a download is simple – if someone opens your software and views material, this is a download. If you place material into your software, this is an upload.

Excess data traffic is charged at .50c per MB or you can upgrade your plan as per the figure below
