## Quality Assure Fire-rated Lining Systems Course

This Quality Assure Fire Rated Lining Course provides participants with skills and knowledge to understand the correct applications and methods of fire rated lining systems and collect evidence to the manufacturer's specifications in accordance with Australian Standards.

The course will cover:

- Characteristics of Fire-rating RFLs, RISF
- Evidence process of ceilings, walls, columns, beans, shafts, metal, char factor, perimeters and penetrations
- Overview of WHS
- Acoustic  $R_w/R_w+ctr$

With this course you will be given confidence in gathering evidence from planning, installation, to completion of fire-rated lining systems and the process of installation of these systems. When assessed as competent, you will receive a Statement of Attainment for **CPCCB4047A Quality assure fire-rated lining systems**.
